

SAS METHOD 2

The method we will use to help you treat your patients with aligners, with the same clinical safety as with braces.

Review your Clinchecks Approvers & iOrtho with our team

Do you want to have the
necessary security to face
any case?

With this method, you will dare to treat any
malocclusion with aligners, find out how we are
going to do it...

1:1 sessions

You will have a calendar available to schedule 1:1 30-minute sessions with each of our mentors.

Plan and solve your cases together with them.

Group clinical sessions

Every week, you will be able to connect with Dr. Luis González to review your cases and see the cases of your colleagues: this way you will learn not only with your own cases, but also with those of others.

Monday
6:00 - 8:00 p.m

Dr. Luis González

24/7 support

You will have access to a private chat with each of the mentors to solve any kind of doubt:

It is possible to treat with aligners? Where can I buy a screw kit? How can I approach this ClinCheck to make it predictable?

A unique opportunity to have answer in less than 24 hours to your clinical questions.

You will be able to upload questions about your cases to our private platform and Dr. Pablo Lirio and Dr. Gerardo del Olmo will make explanatory videos without you having to connect to a session.

Online Training

25 recorded classes

of 45-60 minutes needed to start training in the biomechanics of the Aligners.

25 clinical sessions

with speakers who have treated thousands of cases: 90-120 minute classes that will deal with different malocclusions.

3D Controls Tutorials

of all the main brands of Aligners.

Invisible orthodontic books

Mandibular Advancement, Classes II, Classes III, Transversal Discrepancies with Aligners...

Workshop

We will send you the kit with everything you need to practise at home with the mentors.

TYPODONTS

For the IPR, occlusal grinding and microscrew practices ONLINE.

BURS KIT

All the burs you need for IPR, occlusal grinding and attachment placement and removal, as well as aesthetic contouring at the end of the treatment

TADs KIT

Valued at more than 500€

- 1 miniscrew 1,5x8 mm
- 1 manual screwdriver
- 1 microscrew 2x12 mm

Once you sign up, you will have access to recorded classes, exams and written content so you can begin your training.

- Communication with the technician. Part 1: case prescription.
- Communication with the technician. Part 2: modifications and 3D tools.
- Software guide.
- Placement of attachments. Keys for efficient cementation.
- Attachment guide.
- Interproximal reduction. IPR planning and techniques.
- Guide to IPR.
- Integration of CBCT in digital planification.
- Class II book with aligners.
- Class III book with aligners.
- Attachments.
- Planification in centric relation.
- Predictability of movements.
- Movement sequences.
- Crowding.
- Diastemas.
- Crossbite.
- Open bite.
- Overbite.
- Occlusal adjustments.
- Auxiliary techniques: minitubes and aligners
- Auxiliary techniques: microscrews and aligners.
- Handling of elastics.
- Extractions.
- Preprosthetic orthodontics.
- Canines included.
- Treatment of included canines with aligners.
- Periodontal patients.
- Growing patients: 1st phase treatment.
- Growing patients: mandibular advancement
- Mandibular advancement guide.

In addition, you will have access to different online clinical sessions that will be broadcast live and recorded on the platform

Transversal

- Torque control with aligners in crossbites
- Biomechanical keys and limits of crossbites
- Tips for surviving scissor bites with clear aligners
- Scissor bite treatment with micro-screws and aligners
- MARPE Indications and protocol for placement
- Integration of MARPE in treatments with aligners
- Aligners and skeletal anchorage for the transversal control of the dentature

Sagittal

- CLASS II Diagnosis and planning keys with aligners
- CLASS II Distalization monitoring and anchor management
- CLASS II Frequent problems and auxiliary techniques
- CLASS III What are the advantages of aligners over braces?
- CLASS III Planification and limits of sequential distalization
- CLASS III Handling problems and skeletal anchorage
- Aligners and skeletal anchorage for the sagittal control of the dentature

In addition, you will have access to different online clinical sessions that will be broadcast live and recorded on the platform

Vertical

- 3D diagnosis of vertical problems as a basis for treatment plan
- Strategies to close open bites with aligners
- Hybrid orthodontics: Biomechanical differences between braces and aligners
- Improving post-treatment stability of open bites
- Efficient biomechanics for the closure of open bites
- Differences between braces and aligners for overbite correction
- DEEP BITES How and when to use auxiliary techniques to overcome the limits of aligners

Growing Patients

- Mixed dentition treatments
- Growing patients: 1st phase treatments
- Mandibular advancement
- PALATAL EXPANDER Indications to ensure skeletal effect
- Combined orthopedic and aligner treatments
- Differences between braces and aligners for overbite correction
- RNO & ALIGNERS Myth or reality?

Once you sign up for the program, we will give you the dates of the live sessions, but remember, EVERYTHING is recorded so you can watch it on the platform

FAQS

if I register, will I have direct access to the 12 months?

You will have access to the BASIC BIOMECHANICS section: recorded classes for you to learn and then, live sessions and classes to see little by little.

How are the private case review sessions?

Clinical sessions of 30 minutes where through zoom you will plan together your cases, you will realize the treatment plan with the doctor to better understand the biomechanics of the aligner.

What is private chat?

You will be able to be connected with our doctors 24 hours a day and ask any questions about your invisible orthodontic cases.

What are group sessions?

During 12 months you will have access to group clinical sessions to review your cases or see those of your peers to learn successes and mistakes in planning.

FAQS

Do I have a limit of cases to review?

No, during that year, you will be able to review the cases you need in private and group sessions.

I want to cancel the monthly subscription... Is it possible?

In any case, the SAS Method is not a monthly subscription, the program allows a 12-month installment payment but cannot be cancelled at any time.

I work with in-office aligners... Can I do mentoring with you?

Of course, Curro Segura is an expert in the design and impression of aligners, you will be able to schedule 1:1 sessions with him to review your cases.
